DESCRIPTION

The welding **apron** is an indispensable tool for chest protection during welding, grinding activities, etc. and was created in high quality, real leather (cow crust) which is strong and resistant against heat and sparks.

Kevlar™ stitching guarantees resistance against heat and duration over time. The long, crossover straps are adjustable on the back, together with the quick release buckle at waist height, guaranteeing comfortable, safe use fitted to the body. The front has 4 comfortable, multi-format and multi-purpose pockets, perfect for placing and protecting different types of objects. With 2 metal hooks.

Personal protective device (PPE) conforming to standard UNI EN ISO 11611:2015.
