DESCRIPTION

Professional system for glue repair in a sturdy, recycled plastic case.

Designed specifically to repair damage on external sheet metal without any need to remove paint from the intervention area (PDR – Paintless Dent Repair).

The case allows you to store and maintain the various tools in order and easily transport them to any area of the bodyshop.

The content of this solution includes a variety of tools all designed to meet needs in the various stages of repair with glue: suction cups in various shapes and sizes, two types of glue (Elastic and Strong) according to the type of damage, Lithium battery hot glue gun with adjustable temperature, puller hammer, compact traction puller, aluminium hammer with interchangeable heads and super glue remover spray.
