

- Intelligent digital tester for checking the charge status of a battery and the correct functioning of the vehicle's starting system and battery charging system (alternator).
- Extremely compact size, practical and easy to use.
- Allows you to work on 12V batteries (WET, GEL, AGM, PbCa) without disconnecting them from the vehicle, making testing easier.
- The convenient LED system instantly displays information and allows effective battery control.

TECHNICAL DATA

CODE	802783	Battery range	20-150 Ah	WEIGHT	0,13 kg
Battery voltage	12 V	DIMENSIONS	5 x 1,8 x 12,5 cm		

DESCRIPTION

Intelligent digital tester which allows not only the control of the charge status of a battery, but it also verifies the correct functioning of the starting and charging systems (alternator) of the vehicle's battery. Extremely compact, handy and easy-to-use, it enables to operate with batteries (WET, GEL, AGM, PbCa) at 12V without disconnecting them from the vehicle, making the testing operations easy and quick to perform. The easy led system provides the instant viewing of the information, allowing for an efficient control of the batteries.
