## DESCRIPTION

The air suction dent puller is a tool for the efficient repair of dents on large surfaces, especially on door panels and light commercial vehicles, without having to remove paint. Thanks to its vacuum technology powered by compressed air, this device offers a powerful pulling force, allowing you to eliminate dents quickly and precisely.

The compact size of the puller makes it convenient to handle and carry, allowing easy access to areas affected by dents. With its robust design, reliable performance and easy use, the air suction dent puller (min 4 bar) is the ideal tool for bodywork repair professionals looking for an effective way to eliminate dents and restore the original appearance of vehicles.

Supplied in a plastic case with suction cups in three different sizes: Ø75 mm, 100 mm and 125 mm, to adapt to different types or shapes of dents.
