DESCRIPTION

Cordless hot glue gun powered by an 18V lithium battery, designed for professional PDR repairs in body shops. The temperature is easily adjustable up to a maximum of 220°C to better adapt to the optimal working temperature of the glue you are working with. The gun heats up quickly: in 3 minutes it is already possible to start working. Lightweight and ergonomic, it allows you to work with continuity (glue extrusion 18g/min) and speed. Use 11mm diameter glue sticks.

Equipped with 110V - 250V power supply.
